Thomas Meth, President and Chief Executive Officer

Yana Kravtsova, Executive Vice President, International Market Development & Public Affairs

Brandi Colander, Senior Vice President and Chief Sustainability Office

Christopher Brown, Mid-Atlantic Senior Community Relations Manager

Enviva Leadership,

Enviva's operations cause significant damage across the US South. Enviva destroys 175,000 acres of Southern forests every year. Production facilities release harmful wood dust and toxic pollution in surrounding communities. When burned, wood pellets release more carbon emissions than coal.

Enviva's air and noise pollution is harming residents living near Enviva facilities.

We petition Enviva to heed these concerns, and take immediate action:

- Install fugitive dust control plans at ALL your operating and proposed facilities.
- Put in place best practices for trucks entering and exiting operational sites. The outcome should reduce noise, traffic, and fugitive dust.
- Stop nighttime operations between the hours of 10pm and 7am. Nearby residents need quiet to sleep.
- Stop sourcing from bottomland hardwood forests.
- Establish a Good Neighbor Fund. These resources must improve the quality of life impacts that your operations cause. This includes but is not limited to funding:
 - air purifiers and monitors for impacted communities
 - pressure washing houses and cars due to constant dust

- new health centers in impacted communities
- clean water infrastructure for surrounding communities
- Stop claiming that the wood pellet industry is a form of clean and renewable energy.
- Stop taking government grants and subsidies for your product.
- Commit to halt production expansion.

Your corporation claims it is serious about providing clean and renewable energy. Take corporate responsibility. Act now to protect the quality of life of impacted residents. Enviva must shift to valid clean and renewable energy sources.

Signed by 12,377 individuals (not listed here) and 107 organizations.
